DETAILED ACTION

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 10, the claimed combination including the limitations directed to the specifics of a control apparatus of a variable valve timing mechanism for an engine, comprising a controlled variable detecting section that detects controlled variable of an actuator; a conversion section that converts said controlled variable into the rotation phase with a transfer function representing said variable valve timing mechanism; and an estimation value calculating section that calculates an estimation value of rotation phase based on the rotation phase detected by a phase detecting section and the rotation phase obtained by said conversion section, is not disclosed or rendered obvious the art of record.

Regarding claim 11, the claimed combination including the limitations directed to the specifics of a control method of a variable valve timing mechanism for an engine, comprising the steps of detecting controlled variable of an actuator, converting said controlled variable into the rotation phase with a transfer function representing said variable valve timing mechanism; and calculating an estimation value of rotation phase based on the rotation phase detected based on a crank angle signal and a cam angle signal, and the rotation phase obtained by converting said controlled variable, is not disclosed or rendered obvious the art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
